Instruction:
- Program was developed using Visual Studio 2019 version (on 64 bit windows machine)
- Ensure you have Microsoft Office installed (Office 365 was used in this case)
- Copy the entire folder into your Visual Studio 2019 installation directory
- Launch Visual Studio 2019 and open the project solution GWP2A_Properties
- Click on the run bottom

NB:
If you are using an already existing test input, please make sure you format the
test input data in the format as shown in the excel file included in this project folder
(property_pricing.xlsx).

You may have to re-run the program if it does not open during the first run.
